Key Points

Artemis

- Established in 1997, Artemis has grown to be one of the UK's best known investment houses.
- All Artemis fund managers invest their own money in Artemis funds. That means their interests are closely aligned with those of our investors.
- We take a pragmatic investment approach, and do not categorise our funds as value or growth.
- Each of our ten unit trusts is 'benchmark aware, not driven'. So we invest in a share only if we believe it is going to add value, and not because it represents a percentage of the index.

Fund Manager

- Managed by Peter Saacke since 1st January 2004. Peter joined Artemis in December 2002 after 3 years at Merrill Lynch, where he worked as Pan European Equity Strategist and quantitative economist. Peter holds a BA in Mathematics & Philosophy from Oxford University, an MA in Economics from Freiberg University and a PhD in Economics from Hamburg University.

Fund

- The Fund aims to provide investors with capital growth from a diversified portfolio investing in any sector, anywhere in the world.
- The Fund offers investors no geographical constraints, allowing the fund manager to do the asset allocation.
- SmartGARP™, our proprietary stock-screening tool, is integral to the Fund. It assesses over 6,000 stocks worldwide each day by evaluating key economic indicators and a company's financial DNA. It also assesses when a stock has reached its full potential.
- SmartGARP assimilates vast amounts of data from a wide range of economic and financial information, so allowing the fund manager to move quickly on the best ideas - a process which in other companies would require the support of entire teams.
- Stock selection decisions are 90% SmartGARP and 10% subjective. 80% of the manager's time is spent on the subjective element.
